INDEX TO VOLUME XXV

GENERAL ALPHABETICAL INDEX

PAGES

July 6 ..... 1 to 44
July 13 ..... 45 to 88
July 20 ..... 89 to 132
July 27 ..... 133 to 176
Aug. 3 ..... 177 to 220
Aug. 10 ..... 221 to 264
Aug. 17 ..... 265 to 308
Aug. 24 ..... 309 to 352
Aug. 31 ..... 353 to 448
Sept. 7 ..... 449 to 492
Sept. 14 ..... 493 to 536
Sept. 21 ..... 537 to 580
Sept. 28 ..... 581 to 636
Oct. 5 ..... 637 to 680
Oct. 12 ..... 681 to 724
Oct. 19 ..... 725 to 768
Oct. 26 ..... 769 to 812
Nov. 2 ..... 813 to 856
Nov. 9 ..... 857 to 900
Nov. 16 ..... 901 to 944
Nov. 23 ..... 945 to 988
Nov. 30 ..... 989 to 1032
Dec. 7 ..... 1033 to 1076
Dec. 14 ..... 1077 to 1120
Dec. 21 ..... 1121 to 1164
Dec. 28 ..... 1165 to 1204

A

Abbott Laboratories, Alcohol fumes explode at 343
Abrasives:
——Educational motion picture on industry 181
Accident prevention. DeBlois *403
Acetaldehyde:
——Mfr. of. Backhaus and Arentz. (P.) *1191
——Mfr. of. Matheson. (P.) 668
Acetic acid:
——Synthetic. Deschiens. (S.) 568
——Glacial Mfr. of. Andreau. (P.) .. 482
Acetic ether:
——Properties and uses. 1186
ACID-RESISTING MATERIALS:
——Chemical stoneware:
—— Manufacture of. Jones *389
—— Mfr. at U. S. Stoneware Co. *563
—— Ask embargo on 525
——Enameled equipment:
—— Enameled Steel Manufacture. Jones. *883
—— Enamel-lined apparatus. Jones ... *927
—— Enameled products research laboratory. Poste. *974
—— Uses for industrial enameled equipment. Donauer. *1015
——Rezistal alloy steel *797
Correction. Johnson 905
——Alloy. Milliken. (P.) 339
——Aluminum alloy. Milliken. (P.) 624
——Lead alloy. Fink. (P.) 668
Activated carbon. Ardagh. (N.) 500
African market for American products.. 1178
Air craft:
——Lighter-than-air craft should be developed 626
ALCOHOL:
——As locomotive fuel in Brazil 148
——British plan to facilitate denatured alcohol production 1025
——Ethyl alcohol from coke-oven gas. Basore. (P.) 1152
——Explosion at Abbott Laboratories .. 343
——Export situation 1068
——Industrial alcohol and prohibition comment. Holmes 93
——Polish production 53
——Protest distilled spirits tax 759
——Volstead supplementary prohibition bill:
—— Reported to Senate 77
—— Object to 209
——Want tax to stay 570
Alkaline earth chlorides, Mfr. (B. P.) ... 523
Alloys:
——Alloy work discussed 980
——Electrical resistance alloys. (P.) 1152
——For high-temperature uses, Fahrenwald. (P.) 482
——Containing alkaline earth metals. (B. P.) 933
——For permanent magnets, Hadfield. (B. P.) 482
Alsace:
——Potash production 629, 716
——Mines return to France 876
Alum from alunite. (B. P.) 1064
Aluminum:
——Die-castings. Notes on. Livermore .. 664
——World's production, 1913-1919 245
Aluminum alloy melting furnaces:
——Constitution of gas atmospheres in. Anderson and Capps *54
—— Comment. St. John 452
Aluminum bronze:
——Heat-treatment of. Blue *1043
—— Correction 1140
——Impact strength. Comstock 816
Aluminum-copper alloys. Anderson. (N.). 688
Aluminum sulphate:
——Mfr. of. Moldenke. (P.) 846
——From alunite. (B. P.) 1064
Aluminum-zinc alloys:
——Casting. Livermore 516
Alundum waste subject to duty 671
American Association of Textile Chemists and Colorists:
——Proposed 569
——Organized 936
AMERICAN CERAMIC SOCIETY:
——Exhibition of ceramic wares. Rhead.. 4
——Summer meeting:
—— Program 35
—— Report 122
——To visit England in 1922 343
——St. Louis meeting, 1922:
—— Announcement 209
——At chemical exposition 484
——Report of meeting 592
——Executive meeting, Report 649
AMERICAN CHEMICAL SOCIETY:
——New York meeting:
—— Plans 79, 169, 300, 343
—— Program 483
—— Report *540
AMERICAN ELECTROCHEMICAL SOCIETY:
——Lake Placid meeting:
—— Plans 168
—— Program 569
—— Report *684
——Honors memory of J. W. Richards.. 981
——Directors' meeting 980
American Electrovlaters' Society:
——Indianapolis meeting:
—— Report 132
American Engineering Council:
——Cooley elected president 716
American Foundrymen's Association:
——Convention postponed 212
——To meet in Cleveland 1156
American Gas Association:
——Carbonization committee meets 124
——Chicago meeting:
—— Program 070, 804
—— Report 978
American Hardwood Manufacturers Association:
——Open competion plan declared illegal. 1193
American Institute of Baking moves to Chicago 1113
AMERICAN INSTITUTE OF CHEMICAL ENGINEERS:
——Detroit meeting. Report *6
——Baltimore meeting:
—— Program 934, 1022
—— Report *1124
——Atmospheric pollution committee ... 936
American Institute of Mining and Metallurgical Engineers:
——Wilkes-Barre meeting:
—— Program 300
American Iron and Steel Institute:
——New York meeting:
—— Report 950
American Mining Congress:
——Chicago meeting, Announcement 625
American Peat Society:
——To meet in New York 256
American Petroleum Institute:
——New York meeting:
—— Program 1023
American Society of Mechanical Engineers:
——New York meeting 893
AMERICAN SOCIETY FOR STEEL TREATING:
——Indianapolis meeting:
—— Plans 483
—— Report *642
——To hold sectional meetings 1023
American Tar Products Co. to build new plant 299
American Valuation Association:
——Organization 78
American Wood Preservers' Association:
——Service bureau 525
Amino compounds, Mfr. (B. P.) 1021
AMMONIA:
——Meters for ammonia liquors. Thau. *1062
——Liberation from coal and coke. Monkhouse and Cobb. (S.) 1151
——Gas mask for ammonia approved ... 125
——Distillation of. Douglas. (B. P.) 33
——Distillation of. (B. P.) *1021
——Synthetic:
—— German and American plants compared. Tour. (N.) 9
—— Claude process to be used by Japanese and British 572
Ammonium salts, Mfr. of. (B. P.) 524
Ammonium sulphate:
——British embargo lifted 517
Ammonium-sulphides, Mfr. (B. P.) ... *1065
Antimony in 1920 199
Antimony-lead alloys:
——Properties of. Gurevich and Hromatko *62
Antimony trichloride Anhydrous, Mfr. of. Ralston. (P.) 668
Apparatus, Scientific, Foreign markets for 626
Argon purifying equipment *74
Arsenic compounds:
——Transportation of 345
Arsenical insecticides. (B. P.) 339
Asbestos industry improves 1066
Ash Coal and coke. Fusing temperatures of. Rose 141
Asphalt:
——Production increases 792
——From petroleum residues. (B. P.) .. *715
Associated Business Papers:
——Chicago meeting with N. C. B. P. E. 848
Association of Chemical Plant Epuipment Manufacturers:
——Organization 626
Association of Iron and Steel Electrical Engineers:
——Chicago meeting; Report 716
Association of Official Agricultural Chemists:
——Washington meeting:
—— Announcement 671
Athletics and chemistry. Comment. Turner. 584
Australia:
——National Research Council meets 484
——Bauxite deposits being investigated .. 934
Austria:
——Iron and steel firm, Statement for 1920. 332
Automobile design:
——More miles per gallon. Berry *64
Automobile finishes:
——Chemical engineer's relation to mfr. and application of. Holley..... *873

B

Bakelite patent suit, Decision in 270
Barium chloride:
——Mfr. in ammonia-soda process. MacMahon. (P.) 208
Basset process. (S.) 568
Bauxite:
——Production, 1920 16
——World's production, 1913-1919 245
Bearing metal:
——Frary metal. Electrolytic. Cowan, Simpkins and Hiers *1181
——A hardened lead for *799
——Genelite, a new synthetic *207
Belgian-American Coke Oven Corp. 342
BELGIUM:
——Engineers invited to Liége 760
——Conditions in zinc industry 103
——Industrial statistics, 1920 824
——Production costs for plate-glass 618
Biakmetal. Notes on 163
BIOGRAPHICAL:
——Richards, Joseph William *730
——Sauveur, Albert *15
——Schneider, Eugene *906
——Sharpless, Frederick Fraley *101
——Weidlein, Edward R. 774
Bismuth concentrates. Chinese. Refining. Comment. Diehlman 181
—— Reply. Darling 181
Blast-furnace gas cleaners, Design of. Gellert 287
Blaw-Knox Co. hammer-welding plant. Thum *747
Boiler feed water purification. Applebaum. 23
——Comment. Taylor 640
Reply. Applebaum 992
Boiling points:
——Of salt solutions under varying pressures. Baker and Waite *1137
——Of calcium chloride solutions. Baker and Waite *1174
——Critical study of. Baker. (N.) 9
Book Reviews 37, 79, 213, 257, 480, 572, 626, 713, 845, 977, 1065, 1153, 1192
BOOK REVIEWS:
——Addicks. Copper Refining 257
——Bach and Baumann. Festigheitseigenschaften und Gefugebilder der Konstruktionsmaterialien 480
——Committee on Elimination of Waste in Industry of the Federated American Engineering Societies 1192
——Dyes. The World's Chemical Industry and Trade 572
——DeWolf and Larison. American Sulphuric Acid Practice 1065
——Ellis and Meigs. Gasoline and Other Motor Fuels 480
——Giolitti. Heat-treatment of Soft and Medium Steels 845
——Grabe. Iron and Steel in Sweden .. 213
——Griffin. Technical Methods of Analysis 1065
——Guillet. Metallurgie Generale 1153
——Hackh. Chemical Reactions and Their Equations 1065
——Hale. American Chemistry 977
——India Rubber Goods Manufacture .. 713
——Journal of the Institute of Metals .. 572
——Molinari. Treatise on General and Industrial Organic Chemistry 37
——Rickard. Concentration by Flotation. 977
——Simmons. Rubber Manufacture 79
——Thatcher. The Chemistry of Plant Life 213
——Thorpe. A Dictionary of Applied Chemistry 626
——Whitmore. Organic Compounds of Mercury 1191
Borax:
——Separation from potash. Dolbear. (P.) 623
Boron, Electrolytic production of. Constant. (B. P.) 206
Brass:
——Tin. Heat-treatment of. Guillet. ...*1009
——Conditions in industry 344
——Surface defects on brass sheet. Hays. (N.) 1180

*Illustrated; (P), (B. P.)—United States and British patents respectively; (S.)—Synopsis; (N.)—Papers read at society meetings but not printed in full.

Brazil:
——Electric iron and steel plant. Paulson *1057
——Alchohol as locomotive fuel in 148
——Few purchases of heavy chemicals in. 528
Brick, Cinder cement. To be tested 345
Brick, Paving. Standardization of 892
——Excess varieties eliminated 980
British chemical industry....48, 269, 860, 1038
British Columbia:
——Paper plant reopens 528
——To make steel from magnetite 716
Bromine extraction and apparatus. Dow. (P.) 208
Bronze:
——Schwartz furnace atmosphere when melting complex. Anderson and Capps 103
Budget, Chemical items in 1113
BUREAU OF CHEMISTRY:
——Directorship unattractive to many .. 169
——Acting chief named 255
——Appointment of chief delayed 525
——Report of chief of bureau 1113
BUREAU OF MINES:
——Alloy work discussed 980
——Bureau of Mines to study light alloys. 625
——Ceramic work being expanded 256
——Chemical staff increased 1155
——Co-operative agreements 761
——Non-metallic investigations 527
——Petroleum Experiment Station seeks technical men 123
Bureau of Standards:
——New standard samples 257
Burns from calcium saccharate. Sherrill. 4
Burton, William M., Perkin medalist ... 848

C

Cadmium in 1920. Siebenthal and Stoll.. 29
Cadmium-copper wire. Smith *1178
Calcium carbonate:
——Notes on metallurgy of. Brace *105
Calcium acetate, Mfr. 238
Calcium-barium-lead alloys. Electrolytic. Cowan, Simpkins and Hiers *1181
Calcium bisulphite, Mfr. of. Richter. (P.) 208
Calcium carbonate:
——Forms of 149
Calcium chloride solutions:
——Vapor pressures of. Baker and Waste. *1174
Calcium nitrate, Mfr. (B. P.) 340
Camphor, Synthetic:
——DuPont plant may resume 1156
——Bernyl esters for (B. P.) 715
Cam shafts, Tempering, Wandersee. (P.).. 208
CANADA:
——Brass and copper industry 650
——Business papers, Tribute to 1067
——Ceramic school in Saskatoon 209
——Chemical and allied industries, Statistics 822
——Directory of chemical industries 672
——Glass industry in 1918 115
——Linseed oil in 1918 694
——Soap industry statistics 506
——Soap industry, 1918 751
——Water-power resources 691
Canadian Chicago Bridge & Iron Co. changes name 211
Canis variegatus, Heterogeneity in. Seyt... 92
Capital Increases, etc. 44, 87, 121, 176, 220, 264, 308, 352, 492, 579, 635, 679, 724, 768, 812, 855, 899, 944, 988, 1076, 1120, 1164, 1204
Carbon:
——Activation of. Ardagh. (N.) 500
CARBON BLACK:
——From natural gas in 1920. Sievers. 333
——Supreme Court decision on Wyoming industry. Dannerth 104
——Ruling on 672
Carbon monoxide, Catalytic oxidation of. Frazer. (N.) 1128
Carboys, Regulations for transportation of. 1155
Carelessness, Wastes caused by. De Wolf. 433
Casein cements, Mgr. of. (B. P.) 523
Casein composition. (B. P.) 340
Casein glues durable in damp places 607
Cellulose:
——Action of thiocyanates on. Clayton. (N.) 499
Cellulose esters:
——Solvents for. Willkie *1186
Cellulose ethers:
——Mfr. of. (B. P.) 340
——Mfr. of. Dreyfus (B. P.).....714, 1021
——Celluloid from. Dreyfus (B. P.) ... 715
Cellulose Section, A. C. S.:
——Fall meeting:
—— Plans 34
—— Report 551
CEMENT:
——Potash recovery from cement kilns. Krarup *316
——Chemical engineering needed. Dean.. 439
——Wet process, Critical review of. Meade. (S.) 295
——Foreign specifications 612
——Foreign specifications charted 1020
——Output increases in August 626
——October output 1061
——Philippine industry 735
Census of Manufactures, 1919:
——Preliminary summaries of 465
Central Steel Co. Merger 717
CERAMICS:
——Glimpses of Ohio ceramic industries. Jones ..... I *562, II *619
——Production wastes in. Minton 440
——Ceramics as byproduct of coal mining in Sweden. Beckman 882
CERAMICS—*Continued:*
——Bureau of Mines begins work on heavy clay products 77
——Bureau of Mines ceramic work expanded 256
——Ceramic engineering course at Illinois. 1112
——Ceramic school at Univ. of Saskatchewan 209
——Ceramic Station investigates burning. 527
——Chemical stoneware: (see Acid-Resisting Materials).
——Clay drying, New method 753
——French porcelain industry, Growth of 124
——Gas-fired kiln to be demonstrated .. 979
——Laboratory car for brick kiln tests.. 978
——Lead poisoning in pottery trade 78
——Lecture course on burning of clay... 717
——Pottery expositions being arranged.. 1067
——Pottery products, Lower freight rates sought for 893
——Pottery workers accept wage reduction 290
Chamber of Commerce of the United States:
——Natural resources repartment 893
Charts:
——Hamor's chart of aims of purposeful study of problems of chemical and physical technology *422
——Measuring gases containing water vapor *329
——Volumes of air required in air drying 1088
Chemical and allied industrial markets.... 38, 81, 126, 170, 214, 258, 302, 346, 486, 529, 573, 629, 673, 718, 762, 806, 850, 894, 938, 982, 1026, 1070, 1114, 1158, 1198.
Chemical companies. New 212, 299, 629, 805, 980, 1154
Chemical engineering ideals. Wesson. (N.). 7
Chemical industry:
——Power and fuel data. Goodwin..... 708
——Unemployment decreases in 716
——Employment increases 1066
Chemical market review 628
Chemicals:
——Waste due to lack of standardization. Cohoe 383
——Census report for 1919 465
——List of research chemicals in preparation 569, 892
——Wholesale prices lower 672
——Exports and imports:
—— May, 1921 37
—— Fiscal year 278
—— October 1069
—— Exports, Fiscal year 328
Chemical stoneware: (see Acid - Resisting Materials).
Chemical tonnage on railroads.....77, 716
Chemical warfare:
——Alabama tests 626, 670
——Consideration at disarmament conference 978, 1024, 1069, 1114
——Weeks favors gas development..... 1113
——Spread of war gases subject to control 1156
——Anti-chemical propaganda rife..... 1193
CHEMICAL WARFARE SERVICE:
——Moves offices 78
——New proving ground ready..... 124
——Service school course completed 124
——Needs $4,000,000 next year..... 213
——Training plan outlined 298
——Appropriation increased 1066
——Survey shows gas leaves no permanent injury 1193
Chemical welfare of America. Hendrick. (N.) 803
Chemists' clubs exchange greetings..... 934
Chicago Section, A. Cer. Soc.:
——November meeting 1069
Chicago Section, A. C. S.:
——September meeting 670
——October meeting 849
——December meeting 1195
Chicago's relation to future American steel industry. de Geer 325
Chilean nitrate:
——Declining importance of 717
——New discoveries of 1185
——Situation 1112
China:
——Vegetable tallow industry 522
——Bibliography available 925
Chlorine:
——Electrolytic chlorine: caustic cells:
—— Hooker. (P.) *1152
Chlorine industry, Key position of. Brooks. (N.) 1127
Chromium:
——Electrolytic. (B. P.) 802
Cincinnati needs river terminals..... 1157
Civil service examinations 79, 626, 670, 762, 1070, 1110
Clay, Drying, New method 753
COAL:
——Cleaning by use of oil, Trent process, Perrott and Kinney *182
——Destructive distillation of mixtures of oil and. Davis, Place and Scott... *1131
——Consumption by uses 648
——Low-temperature carbonization. Beilby 228
——Pulverized:
—— In iron and steel industry. Coffin.. *971
——Volatile matter, Determination of. Wilkinson 925
Coal ash, Fusing temperatures of coke ash and. Rose 141
Coal tar:
——Separating water from. (B. P.) *340
Coconut oil:
——Philippine exports of 323
Coffee extracts, Mfr. of. Challas. (B. P.) 76
Coke:
——Coking mid-continent coals *710
——Monthly statistical summary established 210
COKE—*Continued:*
——Studies at Ohio State 571
Coke ash, Fusing temperature of coal ash and. Rose 141
Coke ovens:
——Piette ovens to be introduced..... 342
Colloids:
——Colloid chemistry of petroleum. Padgett 189
Color measurement in industry. Pfund. (N.) 849
Colorado clays to be studied 1157
Colorado Industrial Exposition 1069
Commerce, Department of:
——Annual report of secretary 1111
——Additional commodity divisions 1112
Concrete:
——Use in construction of salt plants. (S.) 75
Congress of Industrial Chemistry at Paris. 893
Connecticut Valley Section, A. C. S.:
——Officers elected 1025
Construction and operation ..... 43, 86, 131, 175, 219, 263, 307, 351, 491, 534, 578, 634, 678, 723, 767, 811, 855, 899, 943, 987, 1031, 1075, 1119, 1163, 1203.
Construction wastes, Elimination of. Burpee 394
Co-operation between University and industry. Johnston. (N.)..... 1195
COPPER:
——Electrodeposition of alternate layers of nickel and. Blum and Slattery.. 320
—— Structure and properties of. Blum. 961
——Electrolytic solution and deposition. Briggs. (N.) 689
——Standards approved by A. E. S. C... 36
Copper alloys:
——Heat-treatment of. Isabellen Hütten Ges. (B. P.)..... 33
Copper: aluminum alloys. Anderson. (N.). 688
Copper-cadmium wire, Smith *1178
Copper shingle production 759
Copper sulphate:
——Mfr. of pure. Mackay. (B. P.) ... 251
Cordite, Artificial leather from 528
Cores:
——Air required in baking cores made with linseed oil. Grubb and Jamison 793
—— Comment. Olsen 948
Cost methods:
——Disclosing waste through better. Wesen 389
Cottonseed products, Fundamental research program for 1067
Cottrell precipitator: (see Electrical Precipitators).
Crane, General purpose crawling tractor.. *712
Crankshaft, Metallurgical examination of broken *14
Credulochemistry. Comment. Frary 773
Crushing:
——Symposium at chemical exposition .. 587
Crystal structure:
——Studies with X-rays. Bain *657
Crystallization, Impurities retard. Walton. (N.) 1025
Current Events ..... 34, 77, 121, 165, 209, 253, 297, 341, 483, 525, 569, 625, 670, 716, 759, 803, 847, 892, 934, 978, 1022, 1066, 1109, 1154, 1194.
Cyanamide:
——Electrolysis of. Kameyama. (N.).. 686
Cyanure azide. Ott. (P.)..... 1192
Czechoslovakia:
——Radium production 1050
——Restricts exports 934

D

Dartmouth College dedicates Steele Chemistry Building 936
Decolorizing carbon:
——Mfr. DeBruyn. (B. P.) 296
De-inking process, Chemical control of. Joyce 248
Delaware Section, A. C. S.:
——October meeting 849
Dental amalgams. Gray. (N.)..... 1112
Deoxidizers:
——Alloys. Vos. (P.) 482
Detinning processes:
——Oleum. Mackay. (B. P.)..... 251
Detonator, New. Ott. (P.) 1191
Deutsche Chemische Gesellschaft:
——November meeting 1156
Dialkylaminoalkyl compounds. (B. P.)... 1064
Diethyl sulphate, Properties. Curme 957
Distillation:
——Separating organic substances by. (B. P.) 1064
DRYING:
——Air drying, Volumes of air required in. Mitchell *1088
——Symposium at chemical exposition... 588
——Air conditioning in. Lissauer. (N.).. 589
——Atmospheric. Stern. (N.) 589
——Moist air. Stonex. (N.) 588
——Selection of driers. Landell. (N.)... 588
——Vacuum. Chen. (N.) 589
DuPont Fiberslik Co. plant in operation.. 36
Dye Division, A. C. S.:
——New York meeting:
—— Plans 168
—— Report 544
DYE LEGISLATION: (see also Tariff).
——Investigation of dye industry demanded 121
——Dye embargo eliminated as tariff passes House 165
——Another Moses amendment 168
——Dye vote surprises Congress 209
——Dye embargo extended 297

*Illustrated; (P), (B. P.)—United States and British patents respectively; (S.)—Synopsis; (N.)—Papers read at society meetings but not printed in full.

INDEX

DYE LEGISLATION—*Continued:*
——Dye embargo argued at Senate hearings 297
——Senator Ladd's plea 342
——Joint dye committee named 344
——Extension of temporary dye control 345, 485
——Special duties continued 525
——Plea for protection. Hendrick. (N.). 803
——Dye and chemical control extended... 805
——Dye investigation not ordered 1022
——Dye investigation ordered 1109
—— Senate sub-committee appointed .. 1193

DYES:
——Is there an American dye monopoly? Breithut *594
——Census of dyes and coal-tar chemicals, 1920 ..... *166
——Natural dyes and extracts. Census report on 466
——Anthracene. (B. P.) 1021
——Germany advances prices 525
——Indigoid vat. (B. P.) 933
——Industry lacks business knowledge... 434
——Monoazo. Morgan. (B. P.)..... 33
—— (B. P.) 933
——National Lime Association urges protection 123

E

Earthenware, Embossed. Reduced duty for. 717
Edible oils:
——Basic technical information needed. Ingram 438

EDITORIAL:
——Act! but think first..... 726
——Administrative and business opinions on tariff policy..... 1077
——Agricultural support for the chemical industry 901
——Alcohol dyes and industrial supremacy 221
——And again, what is a chemist?..... 451
——And now the question: "What is the chemical engineer?" 683

Leather Chemistry Division, A. C. S.:
——New York meeting. Report 549
Legal Notes 31, 68, 159, 324, 464, 512, 795, 872, 926, 1054
LEGAL NOTES:
——Air pollution and wastefulness. Dannerth 104
By Wellington Gustin.
——Chemical company obtains reversal of decree under workmen's compensation act in Maine 160
——Churchward patents held no invention—Prior art and history of vanadium alloys 159
LEGAL NOTES—*Continued:*
——Company held not responsible for injury to employee by explosion in gas pipe line 68
——Condition in offer prevents contract agreement 796
——The Conrad patents, the noiseless gear, using Bakelite micarta, void for lack of invention 795
——Cyanide pond owners liable for death of live stock 464
——The Gaulin patent, Claim 7, held valid, but not infringed 1054
——George patent for cooling bed held an advance in art and valid..... 324
——Laboratory tests cannot outweigh the test of practical use 926
——Nitric acid with sulphuric acid added to prevent corrosion not subject to duty 464
——Non-delivery under installment contract not justified by non-payment for past delivery 31
——Nuisance in storage of crude petroleum 464
——Only attempt to sell goods as another's is unfair competition..... 69
——Pearse patent held anticipated and void by District Court 872
——Sale of goods before organization of company 872
——Tank agitation patent held invalid as not being invention 926
——Trader may announce in advance circumstances under which he will refuse to sell..... 872
——Utzma patents for gypsum plaster board held valid 512
——When mechanical equipment does and when it does not become fixtures.. 31
Lehigh Valley Section, A. C. S.:
——September meeting..... 670
——Officers elected 1157
Lenses, Microscope 115
Libraries, Special, Directory of..... 909
Lighting, Poor, Elimination of waste due to. Harrison *407
Lightning, Acid tank struck by. Wolf... *336
Lignite:
——Briquetting. Thomson. (N.) 500
LIME:
——Dependence of lime industry upon nature and science. Little 149
——Fine art of lime burning. Wood *705
——Available lime in quicklime and hydrated lime. Whitson 740
——Separation from dolomite. Schurecht. (S.) 891
Linseed oil:
——Canadian industry, 1918 694
——Boiling with electric heat 844
Lithium minerals in 1920 21
Lithopone:
——Production costs 1196
——Sales in 1920 346
Litigation wastes. Gustin 423
Location as a factor in eliminating waste. Kelsey 401
Lubricants:
——Mfr. (B. P.) 1021
Lumber industry:
——Waste in. Clapp 446
——Chemical dips prevent blue stain.... 286
——Dry kilns, Progressive and compartment 746
Luxembourg iron industry 1102

M

Machinery, Automatic, Eliminating waste with. Hires 410
Magnesium carbonate:
——Use in glue 508
Magnesium chloride:
——Anhydrous, Mfr. of. Goldschmidt. (B. P.) 33
Magnesium-manganese alloy. Veazney. (P.) 339
Magnesium oxychloride cements:
——Plastic calcined magnesite and oxychloride cements. Seaton *238
——Action of lime in. Seaton, Hill and Stewart *270
Magnet steel, New 1129
Maine:

——Organization 342
——Meeting 980
Salt:
——Boiling point of salt solutions under varying pressures. Baker and Waite *1137
——Technically trained men needed. Badger 442
——Use of concrete in salt plants. (S.). 75
——Electrolysis of salt solutions. Hooker. (P.) *1152
Salt cake furnace. Laury..... *834
Sauveur, Albert, honorary member of steel treaters *15
Sawdust, Destructive distillation of..... 240
Schneider, Eugene, receives John Fritz medal 121, *906
Schwartz furnace atmosphere, Notes on. Anderson and Capps..... 103
Science and the coming agriculture. MacDowell 785
Scientific bureaus, Tinkering with..... 1025
Scleroscope, Improved *1107
Selenium oxychloride:
——Mfr. of. Lenher. (P.)..... 623
Shale oils (see Oil shales)
Sharpless, Frederick F., Secretary, A. I. M. E. *101
Shellac:
——Handbook on Indian industry..... 278
——Indian tax on..... 526
Siam:
——Experimental paper mill for..... 528
Silica gel, Catalytic oxidation with. McKee. (P.) 1191
Silicates, Soluble alkali, Mfr. (B. P.)... 524
Silk, Artificial:
——DuPont Fibersilk Co. plant in operation 36
——Preparing threads. Bouffe. (B. P.) *33
——Treatment of. (B. P.)..... 802
Silver:
——Melting in electric furnaces. Herlenius *454
—— Comment. Northrup 904
——Melting fine and sterling silver by electricity. DeFries *507
Slag, Converter, Granulating. Garr. (P.). 208
Slate industry utilizing waste..... 167
Slip interference theory (see under Metals)
Smoke nuisance:
——Elimination of. Landolt..... *428
——Pyrites Co., Ltd., exonerated..... 37

SOAP:
——Waste in mfr. of. Chester..... 445
——Census report for 1919..... 469
——Canadian industry 1918..... 751
——Canadian industry statistics..... 506
——Conference on specifications planned. 803
Société de Chimie Industrielle:
——Paris meeting:
—— Announcement 484
——Subdivision in sections. Kestner. (S.) 164
Society of Chemical Industry:
——Montreal and New York meetings:
—— Plans 79, 256
—— Officers and visitors at..... *357
—— Report of Canadian meeting..... *496
Society of Industrial Engineers:
——Springfield meeting 527
Sodium cyanide, Mfr. (B. P.)..... 802
Sodium formate, Mfr. (B. P.)..... 933
Sodium hydrosulphide, Reduction by. Lapworth. (S.) 338
Sodium naphtholate. Chebotaref. (P.)... 482
Sodium nitrate sold by War Dept. 1198
Sodium perborate, Electrolytic production. Alsgaard. (N.) 686
Sodium peroxide causes fire..... 1156
Sodium silicate:
——Relation of structure to free alkali in. Stericker *61
——In papermaking. Vail 823
Sodium telluride. Liddell 453
Soil, Corrosive action on pipes to be studied 1014
Solvent extraction in vegetable oil industry. Shrader *94
Solar cooker on Mount Wilson. (S.)..... 481
Solid solutions, Hardness of. Rosenhain. 243
Solutions, Diluting, Convenient formula for. McMillan 206

SOLVENTS, VOLATILE, RECOVERY OF:
——Bregeat process. Comment. Lawrence 93
—— Reply. Rouilleux and Dort..... 181
—— Comment. Austin 816
—— Comment. Blair, Campbell & McLean 904
—— Reply. Lawrence 904
Southern pine waste, Complete utilization of 345
South Sea Islands:
——Commercial possibilities 561
Spain:
——Proposed export tax on pyrites protested 525, 1157
——Hydro-electric projects in 830
Spotted dog. Martin Seyt..... 92
Special Libraries Association:
——Directory 909
Specifications, A. S. T. M., French edition 256
Spectroscope, Examining converter flames with. Campbell 618
Squaring a circle. Patterson..... *1063
Stainless steel 717, 1108

SUGAR:
——Improvements needed in cane sugar industry. Coates 438
——Beet sugar crop forecast..... 672
——Beet-sugar industry in northern France 188
——Color value of solutions..... 792
——French production, 1920-21 season.. 148
——Philippine sugar exports..... 119
Sugar Chemistry Division, A. C. S.:
——New York meeting, Report..... 551
Sulphites, Sulphate-free. Shenefield, Vilbrandt and Withrow..... 953

SULPHUR:
——Mexican deposits to be developed... 571
——Refining. Bacon and Wenrich. (P.) 339

SULPHURIC ACID:
——Recent developments in sulphuric acid industry. Fairlie. .....I. *861
II. *917
III. *964
IV. *1005
——Distillation studies of nitric acid and sulphuric-nitric mixtures. Pascal. I. *1103
II. *1145
——Use by industries during war. Bailey. (S.) 481
——Selenium process. Haessler. (N.).. 547
——Cascade pan, New type. Thiele. (P.) *623
Superpower survey:
——Chemical power and fuel data. Goodwin 706
——Industrial power and fuel used in zone 470
——Report almost ready 625
——Summary of report..... 889
Surface tension, Measurement of. Fahrenwald. (S.) *295
Sweden:
——Ceramics as by-product of coal mining in. Beckman 882
——Fertilizer export embargo lifted.... 670
——Iron industry conditions in..... 952
Switzerland:
——As market for American goods..... 882
Synopsis of Recent Chem. & Met. Literature, 32, 75, 120, 164, 295, 338, 481, 568, 623, 667, 713, 801, 891, 1108, 1151, 1191
Synthetic Organic Chemical Manufacturers' Association:
——Organization 847
——Meeting 1024

T

Tanning:
——Fish skins. (B. P.)..... 802
——Vacuum-pressure process. (B. P.).. 1064
Tanning extracts:
——Extracting catechin and catechu-tannic acid. (B. P.)..... 76
TARIFF:
——Minerals. Comments. Brown. Burdick 5
——Chemical schedule of Fordney bill... 11
——Protest duty on jute..... 77
——Tea waste duty opposed..... 122
——Potash duty faces hard fight..... 124
——Dye embargo eliminated in House.... 165
——Another Moses amendment 168
——Dye vote surprises Congress..... 209
——Manufacturing chemists make plea for protection 210
——Senate committee busy on..... 254
——Dye embargo extended..... 297
——Dye embargo argued at Senate hearings 297
——Chemical schedule considered..... 341
——Extension of temporary dye control, 345, 485
——Ask embargo on chemical stoneware 525
——Duties on non-metals asked..... 528
——Interest unprecedented 571
——Farmers to demand free fertilizers.. 571
——Tariff to fore again..... 893
——Emergency tariff act extended..... 936
——Postmaster General Hays discusses.. 979
——Summary of tariff information to be revised 1025
Tax bill:
——Some business aspects of 1921 revenue act. Haig 1130
——Finally approved 1068
Technical Association of Pulp and Paper Industry:
——Notes 210, 299, 526, 572, 626
Tellurium:white metal alloys, Notes on. Ransom and Thieme..... *102
——Comments. Liddell 268, 453
Textile chemists' society: (see American Association of Textile Chemists and Colorists.)
Textile industry:
——Causes of waste in 436
Thallium-lead alloys, Corrosion. Fink (N.) 685
Tin-lead alloys, Electrodeposition. Blum (N.) 690
Tin scrap, Detinning: (see Detinning Process)
Tires, Pneumatic:
——Determining factors for life of. Nelson 153
—— Comment. Pickering 268
Titanium:
——Action in blast-furnace slags. (S.). 801
——Contribution to study of. Billy. (S.) 1190
TNT for road building 331
Trade associations:
——Proper functions to be defined..... 1113
Transformer oil sludge. Rodman. (N.).. 685
Trent process:
——Laboratory studies of 183
——Distillation of mixtures produced in. 1131
Tropine derivatives. (B. P.)..... 802
Trucks, Electric storage battery, vs. wheelbarrows 74
Tungsten:
——Developments in mfr. of. Lohmann. (S.) 120
——Tungsten wire, Mfr. (B. P.)..... 340
Turpentine: (see Naval stores)

U

Ultra-violet light, Uses of. Wood. (N.).. 1128
Unemployment diminishing 981
United States Potters Association:
——To meet in Washington 935
United States Smelting, Refining & Mining Co.:
——New stack at Midvale plant..... 37

V

Vapor pressure of system calcium chloride-water. Baker and Waite..... *1174
VARNISH:
——Automobile finishes. Holley..... *873
——Hardened rosin and resin esters. Murray 473
——Ideal specification. Ingalls..... 505
——Waste control. Perry. (N.) 501
——Census report for 1919..... 468
——Symposium at chemical exposition. 590
——Improving. Perry 444
——Laboratory control. Nemzek. (N.) 590
——Limitations of standardization. Kohr. (N.) 591
Varnish oils, Wastes in. Eisenschiml.... 444
Vaseline, Vapor pressure *752
Vegetable gelatine. (B. P.)..... 76
Vegetable oil industry:
——Solvent extraction in. Schrader..... *94
Vegetable tallow:
——Chinese industry 532
Viscosimeter, Air bubble. Abrams, Kavanagh and Osmond *665

W

War minerals relief act modified 1066
Washington Chapter, A. S. S. T.:
——December meeting 1197
Washington Section, A. C. S.:
——Officers elected 979
WASTE IN INDUSTRY:
——Accident prevention reduces. DeBlois. *403
——Construction wastes, Elimination of. Burpee 394
——Cost methods should disclose. Wesson 389
——Educational. Godfrey 378
——Engineering and management. Poor, Kimball 375
——Fire waste. Richardson 397
——Human waste. Mock *369
——Lighting. Poor, Elimination of. Harrison *407
——Litigation. Gustin 423
——Location as a factor in eliminating. Kelsey 401
——Machinery for eliminating manufacturing wastes. Hires 410
——Marketing waste, Eliminating. Basset 420
——Patent situation. Prindle 417
——Personnel problem. Hopkins 385
——Power plants. Myers 413
——Research, Role of. Howe 379
——Smoke, fume and gas nuisance. Landolt *428
——Standardization of chemicals, Lack of. Cohoe 383
——Waste and inefficiency in the industries 433
—— Cement Dean 439

*Illustrated; (P), (B. P.)—United States and British patents respectively; (S.)—Synopsis; (N.)—Papers read at society meetings but not printed in full.

WASTE IN INDUSTRY—*Continued:*
—— Ceramics. Minton 440
—— Dyes 434
—— Edible oils. Ingram 438
—— Fertilizers. MacDowell 445
—— Food preservation. Cruess 435
—— Food products. Menge 435
—— Glass. Tillotson 437
—— Glue. Tennant. Bogue 443
—— Leather. Wilson 436
—— Lumber. Clapp 446
—— Meat packing. Tolman 437
—— Naval stores. Croswell 440
—— Paint and varnish. Perry 444
—— Paint and varnish oils. Eisenschiml 444
—— Paper. Rue 447
—— Petroleum. Hamor 441
—— Petroleum refining. Pogue 442
—— Rubber. King 434
—— Salt. Badger 442
—— Soap. Chester 445
—— Sugar. Coates 438
—— Textiles 436
—— Wood distillation. Root 448
—— Wastes caused by carelessness. De Wolf 433
——Extracts from F. A. E. S. committee report:
—— Loss in production due to ill health 374
—— Waste due to interrupted production 382
—— Performance standardization 384
—— Waste due to restricted production 388
—— Opportunity for governmental assistance 393
—— Responsibility of owners 406
—— Some causes of low production .. 412
——Estimated savings with superpower system 416
——Hamor's chart of aims *422

WASTE IN INDUSTRY—*Continued:*
——Material handling as factor in eliminating. Coes 1096
——Role of libraries in eliminating. Walker 904
Water, Removing dissolved oxygen from. (B. P.) 669
Water power, World reserves 1048
Water purification:
——Effect of hydrogen-ion concentration on. Wolman and Hannan *502
Water softening:
——Boiler feed water purification. Applebaum 23
—— Comment. Taylor 640
—— Reply. Applebaum 992
——Permutit patent found infringed .. 207
Weidlein, Edward R. *774

WELDING:
——Welding; Particularly hammer welding. Thum *553
——Hammer-welding plant of Blaw-Knox Co. Thum *747
——National Tube Co.'s hammer-welded pipe plant. Thum *921
——Metallography of oxyacetylene weld as affected by enameling. Poste (S.) 801
——Fusion welding. Miller. (N.) 950
——Eliminating blow-holes in Thermit welds 523
——Hammer-welded penstock joints withstand bursting pressures *805
——Electric. (B. P.) *524
Wire drawing, Elongated structure. Hoffman. (N.) 1197
Wood:
——Air-seasoning. Reducing time and cost of 515
——Blue stain prevented by chemical dips 286
Wood acids 696

Wood distillation:
——Hardwood distillation industry. Hawley ..... I *137, II *195, III *237
——Waste in. Root 448
——Treated wood gives more methanol. 566
Wood Waste Exchange transferred to Forest Products Laboratory 123

X

X-Rays:
——Studies of crystal structure with. Bain *657

Y

Yale University, Sterling Chemical Laboratory 301, 892

Z

ZINC:
——Belgian conditions 103
——Electrolysis vs. retort smelting. Laist 754
——Electrolytic:
—— Electro metallurgy. Ingalls. (N.) 689
—— From zinc cyanide solution. Wernlund. (N.) 690
—— Plant capacities 607
—— Purifying solutions for. Field. (B. P.) 252
——From lead-zinc ores. Elmore. (B. P.) 252
——Production, First half, 1921 622
——Strengthening by compression 1180
Zinc alloys, Strengthening by compression 1180
Zinc-aluminum alloys:
——Casting. Livermore 516
Zinc chloride:
——Mfr. of. Danckwardt. (P.) 208
Zinc cyanide plating solutions 977
Zinc dust, Production 1919-20 301
Zinc pigments marketed 1919-20 286
Zirkite, Purification in electric furnace. Thompson. (N.) 683

*Illustrated; (P), (B. P.)—United States and British patents respectively; (S.)—Synopsis; (N.)—Papers read at society meetings but not printed in full.
